

OOLIGHT USER MANUAL

Thank you for purchasing this Oolight Product. Please read this manual carefully before use and keep it for future reference!

IN THE BOX

BATTERY INSTALLATION

Before first use, please unseal the tailcap and remove the insulating film. If the battery needs to be replaced, make sure that the positive end of the new battery faces the flashlight head when you put it in.

AVAILABLE BATTERIES

- 1 x customized 5000mAh 21700 rechargeable lithium battery

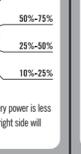

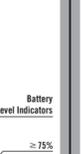

INDICATORS ON BOTH SIDES

Brightness Level Indicators

Battery Level Indicators

USB MAGNETIC CHARGING CABLE -- MCC3

Parameter	Specification
Charging cable	USB Type A - magnetic charging connector, length: 0.5m
Input	USA - A - Type DC5V 2A
Charging current	CC/CV
Maximum charging current	2A
Voltage of fully charged battery	4.2V ± 0.02V
Time to fully charge	5.5 hours (for reference only, when the USB capacitor charging time will be longer)
Charge indication	Red light: fully charged (100%) or disconnected with USB

PROXIMITY PROTECTION FUNCTION

When the light is on and set at level 3 or higher brightness, if the front lens proximity sensor detects an obstructive object, the brightness will automatically reduce. The brightness will restore when the obstruction is gone. The light will turn off directly if the object continues for more than 1 minute.

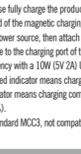

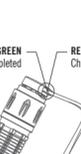

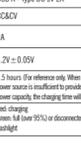

WARNING

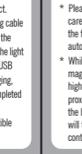

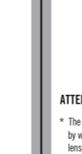

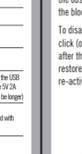

- DO NOT activate Turbo mode repeatedly under high temperature to prevent the flashlight body from overheating and hurting the user's hand.
- The tail switch may not work while immersed in sea water or other conductive media. Please try to keep it clean and dry.
- DO NOT use non-protected rechargeable batteries.
- DO NOT use the battery if the battery is broken, or in any other compromised state.
- Do not touch the switches if the flashlight is left unattended, as accidental activation may melt the lens or the flashlight body and cause objects to burn, or even result in unexpected disasters.
- Store the battery with care. If the battery needs to be changed, please take good care of the battery before. Do not mix it with the conductive media.
- DO NOT clean the lens with alcohol or any other chemicals.

NOTE: While the light is on, if the battery power is less than 10%, the lowest indicator on the right side will glow red.

CHARGING

CHARGING

ATTENTION

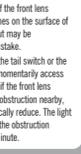

The built-in sensor may NOT work if it is blocked by water or dirt on the front lens. Please keep the lens clean to ensure that it works properly.

* Before first use, please fully charge the product. * Connect the USB end of the magnetic charging cable to an external USB power source, then attach the other end of the cable to the charging port of the light (best charging efficiency with a 10W USB-A USB power source). The red indicator means charging, while the green indicator means charging completed (Battery level > 95%).

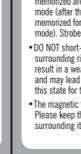

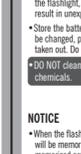

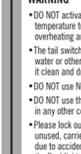

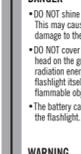

* Do not charge with standard MCC3, not compatible with other MCC.

* The tail switch may not work if the obstruction continues for more than 1 minute.
